SampleCode

Here is a GitHub repository containing sample code that utilizes Kitronyx's snapshots and log files.

FolderTree

```
├─MatLAB
│   └─ReadKitronyxCsv
│   ├─CalculateDriftRate
│   ├─DataStatistics
└─Python
     └─ReadKitronyxCsv
```

MatLAB

ReadKitronyxCsv

```
-. Collection of functions to read Kitronyx snapshot and log CSV files
```

CalculateDriftRate

```
-. Calculate drift rate for all log data
```

DataStatistics

```
-. Calculate sum, average, maximum, and minimum values for all nodes.
```

Python

ReadKitronyxCsv

```
-. Collection of functions to read Kitronyx snapshot and log CSV files
```
